Overview

Taylor's practice focuses on administrative law in the area of public utility regulation. She represents investor and municipally owned utility clients before the Public Utility Commission of Texas, Railroad Commission of Texas, Texas Commission on Environmental Quality, and the State Office of Administrative Hearings.

Prior to joining private practice, Taylor worked as an attorney at the Public Utility Commission of Texas, which gives her unique insight in representing and advocating on behalf of her clients who appear in front of the Commission. During her time at the Public Utility Commission of Texas, Taylor represented Commission Staff in a wide variety of contested case matters, including electric, water, and sewer utility rate cases; certificate of convenience and necessity proceedings; dual certification proceedings; sale, transfer, and merger proceedings; pass-through rate change proceedings; temporary manager appointments; consumer complaint proceedings; energy efficiency cost recovery factor proceedings; and distribution cost recovery factor proceedings.
